# EXPERIMENT 07

## ROLL NO:240701567
## NAME:THENDRAL V

**Aim**

To design multiple UI layouts using GIMP and evaluate them based on user feedback to identify the best design.

**Introduction**

User Interface design plays an important role in enhancing user experience. Different color schemes and layout styles can affect readability, usability, and visual appeal.

In this experiment, a login interface is designed and three different color variations are created using GIMP. These layouts are compared based on user feedback to select the most effective design.

**Procedure (4 Steps)**

**Step 1: Create Base Layout**

- Opened GIMP and created a new canvas (1080 × 1920)
- Designed login interface using Rectangle, Text, and Fill tools
- Added elements like email field, password field, and login button
- Organized components using layers

**Step 2: Create Layout Variations**

- Duplicated the base design using **Image → Duplicate**
- Modified colors using Bucket Fill and Colorize tools
- Created three layouts:
    - Layout 1: Gold theme
    - Layout 2: Orange theme
    - Layout 3: Green theme

**Step 3: Export Designs**

- Exported each layout as PNG format
- Saved as separate files for comparison

**Step 4: Evaluate and Compare Layouts**

- Compared layouts based on appearance, readability, and usability
- Collected feedback from users
- Identified strengths and weaknesses of each design

**User Feedback**

**Layout 1 (Gold Theme)**

- Provides an elegant and premium look with warm color tone
- Overall design is visually appealing and attractive
- Slight contrast issues make some text less clear
- Button visibility can be improved for better usability

**Layout 2 (Orange Theme)**

- Bright and eye-catching design that attracts user attention
- Good visibility of text and buttons due to strong colors
- Highlights important elements like login button effectively
- However, strong color may cause discomfort for long usage

**Layout 3 (Green Theme)**

- Clean and simple design with a balanced color scheme
- Provides good readability and clear visibility of elements
- Comfortable for users and suitable for long usage
- Most preferred layout due to better usability and design

**Result**

The experiment shows that color variations impact user experience significantly.
Among all layouts, the green theme was selected as the best due to its clarity, comfort, and user preference.
